# America's Mosquito Control Professionals Need a Farm Bill

## LET'S GET THIS DONE

The 118th Congress's draft 2024 Farm Bill reported by the House Committee on Agriculture contained several important provisions that reduce regulatory burdens, as well as enhance communication and cooperation between federal, state, and industry stakeholders regarding pesticide regulation, some of which were included in the working draft of the Senate Committee on Agriculture, Nutrition, and Forestry.

**AMCA calls on Congress to swiftly enact a Farm Bill that provides regulatory relief for pesticide users.**

## NOTABLE PROVISIONS SUPPORTED BY AMCA

- Enhanced coordination between the USDA Office of Pest Management Policy (OPMP) and the EPA.
- Elimination of costly, duplicative, and unnecessary Clean Water Act National Pollutant Discharge Elimination System (NPDES) permit requirements for pesticide applicators.
- Clarification on the role of state lead agencies regarding intrastate pesticide regulation.
- Clarification on the role of the EPA to determine the content of pesticide labels.
- Reauthorization of Interagency Working Group (IWG) for Federal Insecticide, Fungicide, Rodenticide Act (FIFRA) and the Endangered Species Act (ESA).
